#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 10/7/04.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 5, 7, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by J. Muir (USPN 1655158).

Muir discloses a preloadable implantation device comprising a needle, and an elongated part, a plunger, the periphery of the plunger defining a channel, and a chamber. (Figures 1-10 and entire reference)

Wherein the needle is chamfered. (Figures 4-9)

Wherein the outside is closed after preloading. (Figures 4-8)

3. Claims 1, 3-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Wiegerinck (USPN 5,405,324).

Wiegerinck discloses a preloadable implantation device comprising a needle, and an elongated part, a plunger, the periphery of the plunger defining a channel, and a chamber. (Figures 1-3 and entire reference)

Wherein the needle and plunger are chamfered. (Figures 1-3)

Wherein the outside is closed after preloading. (Figures 1-3)

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Muir as applied to claims 1, 3, 5, 7, 8 above, and further in view of Wiegerinck.

Muir discloses the claimed invention but fails to disclose the implant is a hormonal implant.

Wiegerinck (USPN 5405324) discloses the implant as a hormonal implant.

At the time of the invention it would have been obvious for one of ordinary skill in the art to combine Muir with Wiegerinck because it is well known in the medical art to use different types of medication with different types of applications, such as using hormonal pills or tablets, as stated in Wiegerinck. (Column 1, lines 1-25)

Therefore, it would have been obvious to combine the teachings of Muir with Wiegerinck to obtain the invention as specified in claims 1, 3-9.

***Response to Arguments***

6. Applicant's arguments filed 10/7/04 have been fully considered but they are not persuasive with regards to Muir and Wiegerinck.
7. With regard to Muir and Wiegerinck, the examiner disagrees with the applicant's arguments. The applicant is mainly arguing that the prior art doesn't teach a closed off

channel in a preloaded state. The examiner interprets this limitation as an intended use limitation. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. There is no structure that is different in the claimed invention over the prior art. See MPEP section 2114. Therefore, the examiner maintains his rejections.

***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew F. DeSanto whose telephone number is 571-272-4957. The examiner can normally be reached on Monday-Friday 9:30-6:00.
